K- My philosophy in research and teaching:

In order to enhance the importance of the role played by financial management and its resources by distributing it well to higher education in Saudi Arabia

Effects - Statement of impacts and modifications resulting from recent developments in information technology and production.

B) To provide comprehensive, integrated and up-to-date coverage of the development of modern accounting systems required in advanced information technology and manage their activities.

As for teaching, the means that must be converted in Arabic

Advice for students and accountants in accounting You have to pay attention to the skills and software required and required of new accountants to enter the local workforce has not kept up with the tremendous developments in information technology
